

Giving you security and peace of mind in your building design

Services:

- Hydrants
- Sprinkler
- Detection and Alarm Systems
- Building Occupant Warning Systems
- Special Hazard Fire Protection Systems

Incredible buildings all start with functional and exceptional designs that focus on protecting the people inside these buildings that matter most. Whether you're constructing a football stadium, a commercial structure or a hospital, it's part of our job to safeguard and protect the lives of building occupants.

Our team of specialists engineers can assist in designing and upgrading hydrants, fire sprinkler and detection systems, working collaboratively with your project team to determine the best and safest outcomes for your design.

With our local strength, knowledge, and relationships, coupled with our world-class expertise, it has allowed us to go anywhere to meet our clients' needs in more creative and personalised ways. We think outside the box to find the best-tailored solution for your project, gaining experience through our contributions to the Atlassian Headquarters, Sandstone Buildings, the Swanston Central, New Footscray Hospital and Penguin Parade on Phillip Island. Fire protection is an indispensable part of producing a safe and reliable building and we strive for outcomes that solve challenges while positively shaping the communities we serve for the better.

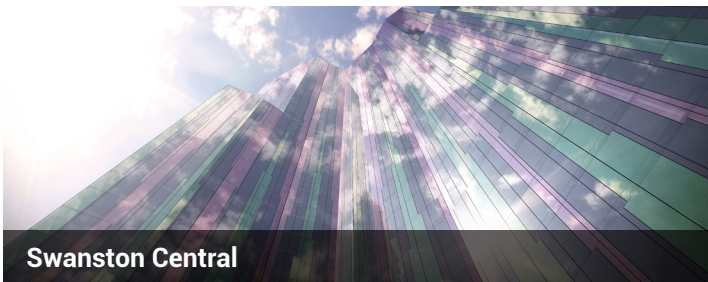

Putting Safety First in Fire Protection

As Australians, we are only too aware of the devastating effects of fire. So no matter how impressive or grand the structure is, it's the safety of the people who use our buildings that matter most. That's why fire protection is such an important and highly regulated service provision.

Whether you're constructing a football stadium, a shopping centre, a hospital or residential building, you need engineers who specialise in fire protection design to safeguard and protect the lives of the prospective occupants.

Our specialist engineers can assist in designing and upgrading or building fire protection systems, working collaboratively with your project team to determine the best and safest outcomes. We've delivered bespoke solutions for some of Australia's best-known and iconic buildings.

We're at the intersection of community, creativity, and client relationships, balancing innovation and project priorities that support our communities in life-saving systems for your project.

Working together

Communities are fundamental. Whether around the corner or across the globe, they provide a foundation, a sense of place and of belonging. That's why at Stantec, we always **design with community in mind**.

We care about the communities we serve—because they're our communities too. We're designers, engineers, scientists, and project managers, innovating together at the intersection of community, creativity, and client relationships. Balancing these priorities results in projects that advance the quality of life in communities across the globe. Stantec trades on the TSX and the NYSE under the symbol STN.
